### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 09 November 2005.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 33 is rejected under 35 U.S.C. 103(a) as being unpatentable over Weber in view of Jones. Weber discloses a packaging and application device for a product comprised of a receptacle having a longitudinal axis, a passageway 12 for the product and an operable end for applying the product, a porous or fibrous applicator element 6, (see column 2, lines 47-52) capable of communicating with the product in the receptacle through the passageway, a dispensing element 5, 18 adapted for opening and closing the passageway 12 wherein the dispensing element is a movable part which is rotatable about the longitudinal axis and movable between a first position wherein the passageway is closed and a second position wherein the passageway is open and a closure cap 9 capable of attachment by a screw thread 8 onto the dispensing element so as to close and open the receptacle and wherein the cap constitutes an enclosed holder for the applicator 16 such that rotational movement of the cap about the axis causes the opening and closing of the passageway (see the paragraph bridging columns 4 and 5). Although the Weber reference does not disclose the type of product being dispensed, attention is directed to the Jones reference, which discloses another dispensing brush wherein nail varnish remover 14 is dispensed therefrom in order to

Art Unit: 3751

enable a user to conveniently dispense nail polish remover onto a nail. Accordingly, it would have been obvious to one of ordinary skill in the art at the time the invention was made that the Weber device can be used to dispense nail polish remover, should a user so choose to employ the device, especially since the Weber reference in no way limits the type of product than can be dispensed therefrom.

### ***Response to Arguments***

Applicant's arguments filed 11/9/05 have been fully considered but they are not persuasive. The Applicant contends that the Weber reference is not applicable against claim 33 in that this reference does not disclose a cap "constituting an enclosed holder" for the applicator element. However, the cap 9 of the Weber device, when screwed onto the device, clearly defines an "enclosed holder" for the applicator 16. The Applicant indicates that this limitation was defined in claims 9-11 and argues accordingly. Claim 9, however, defines a holder for an additional applicator wherein claim 33 does not. Accordingly, claim 33 stands rejected as discussed supra.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 3751

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
